DETAILED ACTION

Drawings

1. Figures 2 and 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Oil Filtering Device in a Crankcase Recess.

Allowable Subject Matter

3. Claims 1-4 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: While it is known in the art to provide an oil filtering device in which a crankcase of an internal combustion engine rotatably retains a crankshaft inside, and an oil passage supplying oil to the crankshaft and a connection passage communicating with the oil passage are formed in the crankcase, comprising a filter element disposed in a

Art Unit: 1724

recess formed inside the crankcase, and a filter flange having a flat lid which has substantially a same shape as an opening of the recess and is fitted in the recess, a cylindrical extension part which extends substantially from a center of the lid, wherein, the filter element is disposed to separate a space enclosed by the recess and the lid into an inlet space communicating with an inlet passage formed thereon and an outlet, and the oil introduced to the inlet space from the inlet passage is filtered by the filter element, discharged into the outlet space, and supplied to the crankshaft from the oil passage (see US Pat No 5,588,405 to Sawa et al.), and it is known in the art to provide an outwardly extending cylindrical extension part in a lid, the part having a communication passage therein, a tip connected to an outlet passage (see US Pat No 1,800,585 to Woolson), in the examiner's opinion, the prior art fails to teach or render obvious combining the known elements to arrive at the instant invention as recited.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References are cited of interest to show the state of the art.

5. This application is in condition for allowance except for the following formal matters:

The drawings and title as noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
